

Behavioral Health Integration Guideline CHECKLIST

8 ELEMENTS OF INTEGRATION

Integrated Care Team

- Practice commitment to culture of teamwork and integrated care
- Clearly defined roles for all team members, including clinicians and non-licensed staff
- Shared workflows between primary care and behavioral health teams; regularly scheduled team huddles and pre-visit planning include all team members (on-site or virtual)

Patient Access to Behavioral Health as a Routine Part of Care

- Clear referral and scheduling process for behavioral health services
- Same day access to behavioral health services (on-site or virtual); at minimum same day care plan development
- Behavioral health services scheduled in a way that best meet the patients need (in person, phone, or virtual), especially in first month of treatment

Accessibility and Sharing of Patient Information

- Patient health information and shared care plan accessible by all care team members through EHR or shared clinical care management system at the point of care
- Regularly scheduled consultations between clinicians to jointly address shared care plan
- Systematic tracking of patient progress toward treatment goals

Practice Access to Psychiatric Services

- Systematic access to psychiatric consultation services for primary care providers (on-site or virtual)
- Clear referral and coordination process to specialty care for complex symptoms and diagnoses
- Bi-directional communication for all referrals

Operational Systems & Workflows to Support Population-Based Care

- Proactive patient screening for alcohol/substance use disorder and select mental health conditions
- Systematic clinical protocols to record, track and follow-up on screening results
- Systematic clinical protocols to track patients with targeted conditions (i.e. registry) and engage with patients who are not improving

Evidence-Based Treatments

- Evidence-based interventions adapted for patient population (age, religion, language, culturally appropriate)
- Quantifiable use of behavioral health symptom rating scale to track patient improvement
- Treatment includes goals of care and support appropriate patient self-management strategies

Patient Involvement in Care

- Patient voice informs the care plan/goal development and patient input central to care plan
- Shared decision making between patient and team, where appropriate
- Patient identified barriers to care related to social support needs are assessed and documented, and staff assist patient in accessing and navigating these social supports.

Data for Quality Improvement

- Systematic tracking of organizational data, such as patient access to behavioral health
- Systematic tracking of patient feedback
- Quality improvement structure to achieve organizational access goals and other identified outcome standards
