

Social Needs and Health Equity Steering Committee
Social Needs Interventions
Proposed Deliverables

Deliverable	Goals	Timeline/Priority
Defining Current Social Need Interventions	Delineate between the different types of social need interventions that are available, including describing community information exchanges, various types of community health worker programs, and existing models for partnering with community organizations.	
Report on Current Landscape of Social Need Interventions in WA	Describe the current social needs interventions operating in WA by region. Especially important to describe current community information exchanges, care coordination hubs, or relative availability of social services that are operating in each region.	
Guidelines for Successful Social Needs Interventions in a Healthcare Setting	Define the technological resources (CIEs, EHR capacity, etc), human resources (social workers, front-line providers, etc) and potential workflows to successfully connect people to social service organizations.	
Recommend Sustainable Funding Mechanisms	Offer up solutions for providing sustainable funding directly to social service partners. Recognize that the capacity of social service organizations is currently limited and must be expanded to address the needs of our state.
