

**Bree Maternal Mental Health Workgroup
Evidence Review Brainstorm**

April 24th, 2023

	Clinical Interventions	Supplemental Pathways (Midwives and Doulas)	Community Supports
Survey Responses	<ul style="list-style-type: none"> • Maternal/Perinatal health access. • Efficacy of screening for perinatal mood disorders, substance use disorders, and intimate partner violence. • Referral pathways once a person screens positive 	<ul style="list-style-type: none"> • Connecting to doulas. • Initiatives to connect midwives to SUD-treatment providers. 	<ul style="list-style-type: none"> • Coordination among community services providers to provide wrap-around services
Meeting Discussion			

Other Considerations:

- Promising/evidence-based practices specifically for tribal communities.
