

Focus Areas	Activities	End Users
Strengthening Best Practices for Lung Cancer Screening and Early Detection	<ol style="list-style-type: none"> <li>1. Standardize evidence based workflows for eligibility verification, LDCT screening, shared decision making, integration of smoking cessation, and follow-up</li> <li>2. Support clinical capacity, care coordination, and navigation to ensure timely and appropriate screening</li> </ol>	Clinicians; Delivery Systems; Health Plans
Advancing Equitable Access and Culturally Relevant Care	<ol style="list-style-type: none"> <li>1. Develop a state-based strategy for identification of eligible Washington residents</li> <li>2. Identify and reduce disparities in screening access, utilization, and outcomes across geography, race/ethnicity, socioeconomic status, LGBTQIA+ communities, and other at risk groups.</li> <li>3. Promote culturally sensitive outreach, education, and community partnership strategies.</li> <li>4. Address financial, logistical, and trust related barriers for eligible individuals.</li> </ol>	Clinicians; Delivery Systems; State Agencies;
Addressing Stigma and Bias around Tobacco and Lung Cancer	<ol style="list-style-type: none"> <li>1. Addressing healthcare provider bias towards people who use tobacco and lung cancer</li> <li>2. LCS program strategies to reduce systematic bias and reach people eligible for screening</li> <li>3. Promote de-stigmatizing messaging around lung cancer and screening for lung cancer</li> </ol>	Clinicians; Delivery Systems; State Agencies
Alignment and Coordination Across Community, Health Systems, and Payers	<ol style="list-style-type: none"> <li>1. Align incentives and pathways to streamline referrals, documentation, and patient navigation</li> <li>2. Establish shared expectations, messaging, and policies to reduce variation in lung cancer screening practices.</li> <li>3. Promote cross sector partnerships among clinicians, health systems, insurers, public health, and community organizations.</li> </ol>	Delivery Systems; Health Plans; Employers/Purchasers; State Agencies
Quality Measurement, Monitoring, and Accountability	<ol style="list-style-type: none"> <li>1. Recommend an aligned set of lung cancer screening quality metrics across delivery systems, payors, and state agencies.</li> <li>2. Develop a statewide monitoring approach to track eligibility identification, screening completion, follow up, and linkage to cessation services.</li> <li>3. Encourage data transparency and continuous quality improvement</li> </ol>	Delivery Systems; Health Plans; Employers/Purchasers; State Agencies

Leveraging Technology and Innovation	<ol style="list-style-type: none"> <li>1. Promote use of EHR tools, automated risk identification, clinical reminders, registries, and decision support.</li> <li>2. Explore telehealth, mobile screening models, and digital navigation tools to extend access to rural and underserved settings.</li> <li>3. Improve data sharing and interoperability to ensure coordinated care across transitions and sites</li> </ol>	Delivery Systems; State Agencies;
Equitable Lung Cancer Screening Policy	<ol style="list-style-type: none"> <li>1. National LCS Recommendations and Practice Guidelines (ACS, USPSTF, NCCN)</li> <li>2. National (CMS) LCS coverage policy</li> <li>3. State-level (Local Commercial and MCO) LCS coverage policy</li> </ol>	State Agencies; Legislative Bodies
