ACT for better diagnosis coalition workgoup- Randy is member
- Measuring diagnostic error is challenge.
- Trying to find what is missed and root cause of missing
- Tools- DEER taxonomy- Steve to share

Webinars and Conference topics- what else is within capability?
Work with data group to come up with improvements in dominate reporting? Outside usual scope but could be within scope
RL Datex- event reporting software- designed around risk mgmt.; report, track and classify events (Steve to Connect)

Randy to go over SIDM and 2015 whitepaper to improve diagnostic error in medicine (outline 9-10 things). #1 problem in quality and safety
Accurate, communicate and timely for better diagnosis ACT

Io- serve on 2 SIDM committees

SIDM tools for patients are impressive- work with coalition members to implement tools and have available (not just on website) for use by patients.
Use member organizations (find person who could push out tools to patients and families)

Misdiagnoses – patients never told; information not transmitted

KP work on systems piece- SURE Net 30-50 things that want to make sure are never dropped.

Surenet webinar- circle back during summer

WSHA has patient safety committee- diagnostic excellence – capable of doing what WPSC can't; formal discussion
Share goal and expectations to safety committee
WSHA safe tables

Utilize membership to reach certain goal

- Overtly work with WSHA PA coalition
- Think about what we can do as coalition that is discreet and measurable
- Come back to April meeting with concrete ideas of what to do
- Kinsey to follow up with Sure Net re: webinar
