Health Care Quality**

**Washington
PATIENT SAFETY COALITION**

Diagnostic Workgroup

**Monday, Sept 14, 2020
Minutes**

11:00 a.m. The full meeting was devoted to the AHRQ/MedStar Health presentation on a project to test two diagnostic tools to help office-based clinicians and their staff reduce diagnostic error.

Marty Hatlie and Kelly Smith presented the Agency for Healthcare Research and Quality's project to test two basic tools designed to help office-based clinicians and their staff reduce diagnostic error. The presentation and slides are available [here](#). This project coincides well with the workgroup's tactic #4: Research and promote patient visit prep tools

Several organizations expressed interest. If you are interested in participating contact the project lead at:
