

Join the Bree Collaborative at the Foundation for Health Care Quality and the Washington Health Alliance on **Thursday April 7** from **10:00 - 11:30 am PT** as we revisit **interoperability** for the second of our **four-part Change in Action webinar series** on accelerators for change to drive value-based success. We are gathering national, state, and local leaders to build a community understanding for where we are as a state compared to last year’s Framework for Action series and move interoperability from an obstacle to an enabler for value-based success.

This webinar is designed to help providers, payers, and purchasers identify ways to work together in transforming value-based payment models to improve health outcomes.

- **Jan Berger, MD, JD, President and CEO, Health Intelligence Partners**, will bring her experience within and without health care systems to frame how data exchange must be timely, personalized, and actionable; calling out a role for employer purchasers and others.
- **Vishal Chaudhry, Chief Data Officer and Cathie Ott, Information Technology Strategic Advisor, Washington State Health Care Authority** will honestly reflect on highs and lows over the last year from the state agency perspective and help lay out where we need to go and who needs to be involved.
- Panel Discussion with **Rick Rubin, CEO, One Health Port; Marla McLaughlin, MD, Medical Director, Central and East Regions, Vera Whole Health; and Sakshi Jain, MHA, Manager, Strategic Programs, Premera Blue Cross** to discuss Washington State’s data pipes, provider, and health plan infrastructure, architecture, and potential.
